IP-guard: Computer Security Software

IP-guard is powerful and easy-to use computer security software for corporations. It can help corporations

- Comprehensively protect information security
- Effectively adjust staff's working behavior
- Centrally and easily manage IT assets and maintain your system

With IP-guard, everything is in your control. It is your excellent helper in computer and internal threat management.

Composed of 14 modules, IP-guard completely meets various management needs. 14 modules can be optionally selected and repacked according to different management requirements.

Protect Information Security

IP-guard provides you with matchless secure experience.

Secure means everything is transparent and be controlled. IP-guard empowers you the powerful ability to control everything so as to enhance your information security. IP-guard can

- cover and control all aspects (e.g., document operation, email, instant messaging, device usage) which might have information leakage likelihood to reduce the risks of information leakage by authorizing specific operation.
- provide encryption and backup features to safeguard your information security.
- record every operation in detail to facilitate your operation.

Regulate Work Behavior

IP-guard helps you improve work efficiency

High efficiency comes from effective and strong management. IP-guard enables you to carry out flexible and efficient control and management so as to standardize your staff's work behavior and improve work efficiency. IP-guard can

- block employees from speculating in the stock market, playing PC online games, accessing illegal websites, etc. With IP-guard, you can allow and limit your employees' specific operation in specific time range.
- control the bandwidth usage. Block Peer-to Peer (P2P) applications, and block illegal and unwanted ports to stop bandwidth hogging. Therefore, bandwidth can be reasonably allocated and network security can be enhanced.
- provide detailed operation log and visual figure of statistic analysis report to help you quickly and easily master the use status of IT resource and your staff's working status.

Management and Maintain IT System

IP-guard assists you with centralized asset management and system maintenance to reduce IT management cost.

Nowadays, the key point of system management is how to ensure the high usability and long stability of IT system with lowest cost so as to sustain the smooth development of key business. IP-guard can

- manage all assets comprehensively and master the information of all IT assets and asset changes within the whole network.
- support software deployment and patch management.
- support remote maintenance and remote control to help you quickly find out and fix the problem.
